

## **Allotments and School Allotment report 2021 – 2022**

The last 12 months at the Borrow Close allotments have been as always a great success. Everybody has remained on their plots growing a wide range of produce. Every year seems to differ as far as results are concerned although the same fruit and vegetables are grown.

We have been very fortunate to receive funding from councillor Craig Rivett for 2 pieces of equipment – A compressor for the allotments and a petrol tiller to be used at the primary school.

### **Carlton Colville Primary School**

As the weather has improved the garden club at the school has restarted after the winter break. Two volunteers + myself take part at the school. The idea is that the children sow seeds, once grown plant them and when ready harvest them to take home, however I am not sure the strawberries make it home!! Each year we add more raised beds to grow a larger range of crops. Having a large tunnel, two green houses and 22 raised beds we could always use more volunteers.
